DAKOTA

Slabs

Parota, also known as Huanacaxtle or Guanacaste, is a premium exotic tropical wood species from Mexico. With bold veins of gold, orange, and brown, these stunning slabs are available in larger sizes than other species, making them perfect for large conference and dining tables.

We also offer beautiful mesquite slabs, which are a rich, medium-dark brown with wavy grains.

Parota and Mesquite slabs are sold unfinished and kiln-dried for added stability and insect prevention.
